SUMMARY

I am Suman Kandi, a BCA final year student Completed hands-on MongoDB, Express.js, focusing on building APIs and managing databases. Currently learning React.js to enhance front-end development skills and become a full-stack developer.

➢ Gained expertise in MongoDB for database operations.

➢ Express.js for API Development.

➢ Node.js for server-side programming.

Currently expending knowledge in React.js to integrate dynamic front-end interfaces .

EDUCATION

➢ **Bachelor of computer Application [BCA]**

Unipower School of IT & Management, Bhadrak || **2022 - 2025**

➢ **Higher Secondary Education [+2]**

Tihidi Higher Secondary School ,Tihidi Bhadrak || **2020 - 2022**

SKILLS

➢ **Programming language :** Javascript

➢ **Frameworks / Libraries :** Node.js, Express.js

➢ **Technical Skills**   **:** HTML, CSS ,Bootstrap

➢ **Databases**   **:** SQL, MongoDB

➢ **Version Control**   **:** Git, GitHub

PROJECTS

➢ **WanderLust :**

- Built Wanderlust, a vacation rental platform similar to Airbnb, utilizing HTML, CSS and Bootstrap to design a user-friendly and visually engaging Front-end interface.

- Working on Wanderlust project using Javascript for development, with Node.js and Express.js handling the backend and API services.

- Implemented MongoDB to handle the database and management of users data, Property details and bookings.

- Implemented core features like user authentication and property listings.

- Built a responsive and easy-to-use interface with Bootstrap for consistent performance across different devices.

➢ **BookHeaven :**

- Developed an Online Book Store web application using the MERN stack.

- Implemented user and admin authentication, cart functionality and order processing.

- Designed RESTful APIs for efficient data communication between frontend and backend.

- Used MongoDB for data storage and ensured real-time updates for a smooth user experience.

- Designed a responsive and easy-to-use interface with Bootstrap for consistent performance across different devices.
